Doyen**Clamp**

Length: 9 in
Inventor: Dr. Eugène-Louis
Doyen

EST.
1887

Clamp Doyen Curved, 9in

Common Uses:

Complex general surgical procedures, Abdominal, Gynecological and Cardiovascular surgeries.

Properties:

- Surface Tip: Serrated
- Material: Stainless Steel
- Handle: Finger Rings

Variations:

- Curved
- Straight

Function:

Grasps and secures delicate tissues such as the mucous surfaces, intestinal walls, omentum, as well as skin. It also works as a hemostat to clamp blood vessels and secure hemorrhages.

Did you know?

The Doyen Clamp is also known as a "non-crushing intestinal clamp" since it is light and the gap in the concavity of the jaws when the instrument is closed prevents tissue damage.
