Forcep

Length: 7 3/4 IN
Author: Michael E. DeBakey

EST.
1948

Forcep DeBakey Vascular 2mm, 7-3/4in

Common Uses:

Thoracic, Vascular and Abdominal Procedures

Properties:

- Length: 6-12in
- Width: 1-3.5mm

Variations:

- Tip: Straight or Angled
- Handle: Flat or Round

Function:

DeBakey forceps are a type of atraumatic tissue forceps used in vascular procedures to avoid tissue damage during manipulation. They are typically large (some examples are upwards of 12in (36cm) long), and have a distinct coarsely ribbed grip panel, as opposed to the finer ribbing on most other tissue forceps.

Did you know?

Michael DeBakey is the father of modern cardiovascular surgery & his DeBakey forceps are the most common atraumatic vascular instrument you can find today.
