Probe Bowman Lacrimonal #1/#2, 5 3/8in, Malleable

Common Uses:

Occlusoplastic Procedures

Properties:

- Common Sizes: #000/0000 - #7/8
- Common Lengths: 5in - 6in
- Double End
- Malleable

Function:

Bowman Lacrimonal Probes are used for restoring normal tear flow to the lacrimal drainage system and clearing nasolacrimal ducts. They feature a double-ended tongue-tie center handle that makes it more incredible for a range of surgical procedures.

Did you know?

William Bowman performed the first iridectomy to ease glaucoma.
