ROCHESTER PEAN

CLAMP

Length: 6 1/4 IN
Author: Jules-Émile Péan

EST.
1862

Clamp Rochester Pean Curved, 6 1/4in

Common Uses:

Used across multiple procedures to control bleeding.

Properties:

- Straight / Curved
- Various Lengths: 5 1/2 - 12 IN
- Serrated Jaw
- Ring Handles w/ Locking Mechanism

Function:

In the initial stages of surgery after the incision is made, hemostat forceps are used to clamp and control bleeding of the exposed arteries before they are fully secured by a ligature. The serrated tips of are closed around the artery and the interlocking teeth of the handle are connected to secure the clamp in place.

Did you know?

Péan performed the first surgery to correct diverticula of the bladder in 1895.
