MOUTH GAG

DENTAL

Length: 4 3/8 IN

Author: John Ellis Jennings

EST.
1914

Dental Jennings Mouth Gag 4 3/8in

Common Uses:

Dental Surgery, Oral Surgery & Airway Management

Properties:

- Two Sided Insertion
- Single self-retaining Ratchet

Variations:

- w/ Tongue Plate
- w/out Tongue Plate

Function:

The two metal frames are placed around the patients head, while the bent sections fit around the front teeth. When the handles are squeezed together, the device opens the patient's mouth to hold it open for surgery in the oral cavity or anesthesia.

Did you know?

The Jennings' gag is a modification of the Whitehead gag, was introduced over 35 years earlier by Walter Whitehead.
