## Noyes Ear Forceps, Serrated Jaws, 5-1/8in

### Common Uses:

ENT and General surgical procedures

### Properties:

- Alligator-type grasping jaws
- Stainless steel

### Variations:

- Smooth grasping jaws
- Serrated grasping jaws

### Function:

A general-purpose tool used in a variety of ENT, outer and middle ear procedures. The long shaft and alligator-jaws allow the introduction of the tip into deep holes which aids in foreign body removal or tissue extraction.

Did you know?

Dr. Henry D. Noyes invented the Noyes Ear Forceps in response to his need for an unobstructed view with its alligator-shaped jaw.
